Wide comparison

Criterion	Monitor	Research	Platform	Interpretation
Criterion 1	A contextual observation for comparison 1.	Sources are independently verified for comparison 1.	`minimum_recent_independent_observations_for_comparison_1`	Keep all five columns and the final interpretation 1.
Criterion 2	A contextual observation for comparison 2.	Sources are independently verified for comparison 2.	`minimum_recent_independent_observations_for_comparison_2`	Keep all five columns and the final interpretation 2.
Criterion 3	A contextual observation for comparison 3.	Sources are independently verified for comparison 3.	`minimum_recent_independent_observations_for_comparison_3`	Keep all five columns and the final interpretation 3.
Criterion 4	A contextual observation for comparison 4.	Sources are independently verified for comparison 4.	`minimum_recent_independent_observations_for_comparison_4`	Keep all five columns and the final interpretation 4.
Criterion 5	A contextual observation for comparison 5.	Sources are independently verified for comparison 5.	`minimum_recent_independent_observations_for_comparison_5`	Keep all five columns and the final interpretation 5.
Criterion 6	A contextual observation for comparison 6.	Sources are independently verified for comparison 6.	`minimum_recent_independent_observations_for_comparison_6`	Keep all five columns and the final interpretation 6.
Criterion 7	A contextual observation for comparison 7.	Sources are independently verified for comparison 7.	`minimum_recent_independent_observations_for_comparison_7`	Keep all five columns and the final interpretation 7.
Criterion 8	A contextual observation for comparison 8.	Sources are independently verified for comparison 8.	`minimum_recent_independent_observations_for_comparison_8`	Keep all five columns and the final interpretation 8.
Criterion 9	A contextual observation for comparison 9.	Sources are independently verified for comparison 9.	`minimum_recent_independent_observations_for_comparison_9`	Keep all five columns and the final interpretation 9.

Criterion	Monitor	Research	Platform	Interpretation
Criterion 10	A contextual observation for comparison 10.	Sources are independently verified for comparison 10.	`minimum_recent_independent_observations_for_comparison_10`	Keep all five columns and the final interpretation 10.
Criterion 11	A contextual observation for comparison 11.	Sources are independently verified for comparison 11.	`minimum_recent_independent_observations_for_comparison_11`	Keep all five columns and the final interpretation 11.
Criterion 12	A contextual observation for comparison 12.	Sources are independently verified for comparison 12.	`minimum_recent_independent_observations_for_comparison_12`	Keep all five columns and the final interpretation 12.
Criterion 13	A contextual observation for comparison 13.	Sources are independently verified for comparison 13.	`minimum_recent_independent_observations_for_comparison_13`	Keep all five columns and the final interpretation 13.
Criterion 14	A contextual observation for comparison 14.	Sources are independently verified for comparison 14.	`minimum_recent_independent_observations_for_comparison_14`	Keep all five columns and the final interpretation 14.
Criterion 15	A contextual observation for comparison 15.	Sources are independently verified for comparison 15.	`minimum_recent_independent_observations_for_comparison_15`	Keep all five columns and the final interpretation 15.
Criterion 16	A contextual observation for comparison 16.	Sources are independently verified for comparison 16.	`minimum_recent_independent_observations_for_comparison_16`	Keep all five columns and the final interpretation 16.
Criterion 17	A contextual observation for comparison 17.	Sources are independently verified for comparison 17.	`minimum_recent_independent_observations_for_comparison_17`	Keep all five columns and the final interpretation 17.
Criterion 18	A contextual observation for comparison 18.	Sources are independently verified for comparison 18.	`minimum_recent_independent_observations_for_comparison_18`	Keep all five columns and the final interpretation 18.
Criterion 19	A contextual observation for comparison 19.	Sources are independently verified for comparison 19.	`minimum_recent_independent_observations_for_comparison_19`	Keep all five columns and the final interpretation 19.

Criterion	Monitor	Research	Platform	Interpretation
Criterion 20	A contextual observation for comparison 20.	Sources are independently verified for comparison 20.	`minimum_recent_independent_observations_for_comparison_20`	Keep all five columns and the final interpretation 20.
Criterion 21	A contextual observation for comparison 21.	Sources are independently verified for comparison 21.	`minimum_recent_independent_observations_for_comparison_21`	Keep all five columns and the final interpretation 21.
Criterion 22	A contextual observation for comparison 22.	Sources are independently verified for comparison 22.	`minimum_recent_independent_observations_for_comparison_22`	Keep all five columns and the final interpretation 22.
Criterion 23	A contextual observation for comparison 23.	Sources are independently verified for comparison 23.	`minimum_recent_independent_observations_for_comparison_23`	Keep all five columns and the final interpretation 23.
Criterion 24	A contextual observation for comparison 24.	Sources are independently verified for comparison 24.	`minimum_recent_independent_observations_for_comparison_24`	Keep all five columns and the final interpretation 24.

After the comparison
