PDF regression

Portrait introduction.

An inline formula $\frac{r(1-p)}{p^2}$ remains beside native selectable prose.

$$\mathbb{E}[X] = p, \quad \operatorname{Var}(X) = p(1-p)$$

Imported units $10\ \mathrm{minutes}$ remain attached to the value.

Wide comparison

Criterion	Monitor	Research	Platform	Interpretation
Criterion 1	Contextual observation 1	Independent evidence 1 $\frac{1}{1}$	`minimum_recent_independent_observations_1`	Final interpretation 1
Criterion 2	Contextual observation 2	Independent evidence 2 $\frac{1}{2}$	`minimum_recent_independent_observations_2`	Final interpretation 2
Criterion 3	Contextual observation 3	Independent evidence 3 $\frac{1}{3}$	`minimum_recent_independent_observations_3`	Final interpretation 3
Criterion 4	Contextual observation 4	Independent evidence 4 $\frac{1}{4}$	`minimum_recent_independent_observations_4`	Final interpretation 4
Criterion 5	Contextual observation 5	Independent evidence 5 $\frac{1}{5}$	`minimum_recent_independent_observations_5`	Final interpretation 5
Criterion 6	Contextual observation 6	Independent evidence 6 $\frac{1}{6}$	`minimum_recent_independent_observations_6`	Final interpretation 6
Criterion 7	Contextual observation 7	Independent evidence 7 $\frac{1}{7}$	`minimum_recent_independent_observations_7`	Final interpretation 7
Criterion 8	Contextual observation 8	Independent evidence 8 $\frac{1}{8}$	`minimum_recent_independent_observations_8`	Final interpretation 8
Criterion 9	Contextual observation 9	Independent evidence 9 $\frac{1}{9}$	`minimum_recent_independent_observations_9`	Final interpretation 9
Criterion 10	Contextual observation 10	Independent evidence 10 $\frac{1}{10}$	`minimum_recent_independent_observations_10`	Final interpretation 10
Criterion 11	Contextual observation 11	Independent evidence 11 $\frac{1}{11}$	`minimum_recent_independent_observations_11`	Final interpretation 11
Criterion 12	Contextual observation 12	Independent evidence 12 $\frac{1}{12}$	`minimum_recent_independent_observations_12`	Final interpretation 12

Criterion	Monitor	Research	Platform	Interpretation
Criterion 13	Contextual observation 13	Independent evidence 13 $\frac{1}{13}$	`minimum_recent_independent_observations_13`	Final interpretation 13
